

ASTRONOMY

TABLE OF CONTENTS

Preface

1 Science and the Universe: A Brief Tour

- 1.1 The Nature of Astronomy
- 1.2 The Nature of Science
- 1.3 The Laws of Nature
- 1.4 Numbers in Astronomy
- 1.5 Consequences of Light Travel Time
- 1.6 A Tour of the Universe
- 1.7 The Universe on the Large Scale
- 1.8 The Universe of the Very Small
- 1.9 A Conclusion and a Beginning

2 Observing the Sky: The Birth of Astronomy

- 2.1 The Sky Above
- 2.2 Ancient Astronomy
- 2.3 Astrology and Astronomy
- 2.4 The Birth of Modern Astronomy

3 Orbits and Gravity

- 3.1 The Laws of Planetary Motion
- 3.2 Newton's Great Synthesis
- 3.3 Newton's Universal Law of Gravitation
- 3.4 Orbits in the Solar System
- 3.5 Motions of Satellites and Spacecraft
- 3.6 Gravity with More Than Two Bodies

4 Earth, Moon, and Sky

- 4.1 Earth and Sky
- 4.2 The Seasons
- 4.3 Keeping Time
- 4.4 The Calendar
- 4.5 Phases and Motions of the Moon
- 4.6 Ocean Tides and the Moon
- 4.7 Eclipses of the Sun and Moon

5 Radiation and Spectra

- 5.1 The Behavior of Light
- 5.2 The Electromagnetic Spectrum
- 5.3 Spectroscopy in Astronomy
- 5.4 The Structure of the Atom
- 5.5 Formation of Spectral Lines
- 5.6 The Doppler Effect

6 Astronomical Instruments

- 6.1 Telescopes
- 6.2 Telescopes Today
- 6.3 Visible-Light Detectors and Instruments
- 6.4 Radio Telescopes
- 6.5 Observations outside Earth's Atmosphere
- 6.6 The Future of Large Telescopes

7 Other Worlds: An Introduction to the Solar System

- 7.1 Overview of Our Planetary System
- 7.2 Composition and Structure of Planets
- 7.3 Dating Planetary Surfaces
- 7.4 Origin of the Solar System

8 Earth as a Planet

- 8.1 The Global Perspective
- 8.2 Earth's Crust
- 8.3 Earth's Atmosphere

8.4 Life, Chemical Evolution, and Climate Change

8.5 Cosmic Influences on the Evolution of Earth

9 Cratered Worlds

9.1 General Properties of the Moon

9.2 The Lunar Surface

9.3 Impact Craters

9.4 The Origin of the Moon

9.5 Mercury

10 Earthlike Planets: Venus and Mars

10.1 The Nearest Planets: An Overview

10.2 The Geology of Venus

10.3 The Massive Atmosphere of Venus

10.4 The Geology of Mars

10.5 Water and Life on Mars

10.6 Divergent Planetary Evolution

11 The Giant Planets

11.1 Exploring the Outer Planets

11.2 The Giant Planets

11.3 Atmospheres of the Giant Planets

12 Rings, Moons, and Pluto

12.1 Ring and Moon Systems Introduced

12.2 The Galilean Moons of Jupiter

12.3 Titan and Triton

12.4 Pluto and Charon

12.5 Planetary Rings

13 Solar System Debris: Comets, Asteroids, and Other Small Bodies

13.1 Asteroids

13.2 Asteroids and Planetary Defense

13.3 The “Long-Haired” Comets

13.4 The Origin and Fate of Comets and Related Objects

14 Cosmic Samples and the Origin of the Solar System

14.1 Meteors

14.2 Meteorites: Stones from Heaven

14.3 Formation of the Solar System

14.4 Comparison with Other Planetary Systems

14.5 Planetary Evolution

15 The Sun: A Garden-Variety Star

15.0 Thinking Ahead

15.1 The Structure and Composition of the Sun

15.2 The Solar Cycle

15.3 Solar Activity above the Photosphere

15.4 Space Weather

16 The Sun: A Nuclear Powerhouse

16.1 Sources of Sunshine: Thermal and Gravitational Energy

16.2 Mass, Energy, and the Theory of Relativity

16.3 The Solar Interior: Theory

16.4 The Solar Interior: Observations

17 Analyzing Starlight

17.1 The Brightness of Stars

17.2 Colors of Stars

17.3 The Spectra of Stars (and Brown Dwarfs)

17.4 Using Spectra to Measure Stellar Radius, Composition, and Motion

18 The Stars: A Celestial Census

18.1 A Stellar Census

18.2 Measuring Stellar Masses

18.3 Diameters of Stars

18.4 The H–R Diagram

19 Celestial Distances

- 19.1 Fundamental Units of Distance
- 19.2 Surveying the Stars
- 19.3 Variable Stars: One Key to Cosmic Distances
- 19.4 The H–R Diagram and Cosmic Distances
- 20 **Between the Stars: Gas and Dust in Space**
- 20.1 The Interstellar Medium
- 20.2 Interstellar Gas
- 20.3 Cosmic Dust
- 20.4 Cosmic Rays
- 20.5 The Life Cycle of Cosmic Material
- 20.6 Interstellar Matter around the Sun
- 21 **The Birth of Stars and the Discovery of Planets outside the Solar System**
- 21.1 Star Formation
- 21.2 The H–R Diagram and the Study of Stellar Evolution
- 21.3 Evidence That Planets Form around Other Stars
- 21.4 Planets beyond the Solar System: Search and Discovery
- 21.5 Exoplanets Everywhere: What We Are Learning
- 21.6 New Perspectives on Planet Formation
- 22 **Stars from Adolescence to Old Age**
- 22.1 Evolution from the Main Sequence to Red Giants
- 22.2 Star Clusters
- 22.3 Checking Out the Theory
- 22.4 Further Evolution of Stars
- 22.5 The Evolution of More Massive Stars
- 23 **The Death of Stars**
- 23.1 The Death of Low-Mass Stars
- 23.2 Evolution of Massive Stars: An Explosive Finish
- 23.3 Supernova Observations
- 23.4 Pulsars and the Discovery of Neutron Stars
- 23.5 The Evolution of Binary Star Systems
- 23.6 The Mystery of Gamma-Ray Bursts
- 24 **Black Holes and Curved Spacetime**
- 24.1 Introducing General Relativity
- 24.2 Spacetime and Gravity
- 24.3 Tests of General Relativity
- 24.4 Time in General Relativity
- 24.5 Black Holes
- 24.6 Evidence for Black Holes
- 24.7 Gravitational Wave Astronomy
- 25 **The Milky Way Galaxy**
- 25.1 The Architecture of the Galaxy
- 25.2 Spiral Structure
- 25.3 The Mass of the Galaxy
- 25.4 The Center of the Galaxy
- 25.5 Stellar Populations in the Galaxy
- 25.6 The Formation of the Galaxy
- 26 **Galaxies**
- 26.1 The Discovery of Galaxies
- 26.2 Types of Galaxies
- 26.3 Properties of Galaxies
- 26.4 The Extragalactic Distance Scale
- 26.5 The Expanding Universe
- 27 **Active Galaxies, Quasars, and Giant Black Holes**
- 27.1 Quasars
- 27.2 Supermassive Black Holes: What Quasars Really Are
- 27.3 Quasars as Probes of Evolution in the Universe
- 28 **The Evolution and Distribution of Galaxies**
- 28.1 Observations of Distant Galaxies
- 28.2 Galaxy Mergers and Active Galactic Nuclei

- 28.3 The Distribution of Galaxies in Space
- 28.4 The Challenge of Dark Matter
- 28.5 The Formation and Evolution of Galaxies and Structure in the Universe

29 The Big Bang

- 29.1 The Age of the Universe
- 29.2 A Model of the Universe
- 29.3 The Beginning of the Universe
- 29.4 The Cosmic Microwave Background
- 29.5 What Is the Universe Really Made Of?
- 29.6 The Inflationary Universe
- 29.7 The Anthropic Principle

30 Life in the Universe

- 30.1 The Cosmic Context for Life
- 30.2 Astrobiology
- 30.3 Searching for Life beyond Earth
- 30.4 The Search for Extraterrestrial Intelligence

A How to Study for an Introductory Astronomy Class

B Astronomy Websites, Image, and Apps

C Scientific Notation

D Units Used in Science

E Some Useful Constants for Astronomy

F Physical and Orbital Data for the Planets

G Selected Moons of the Planets

H Future Total Eclipses

I The Nearest Stars, Brown Dwarfs, and White Dwarfs

J The Brightest Twenty Stars

K The Chemical Elements

L The Constellations

M Star Chart and Sky Event Resources
