openstax™

Instructor getting started guide

Report your adoption

1 Go to openstax.org/adoption to fill out our two-minute survey and let us know you're using OpenStax or recommending it as a resource. Your feedback will help secure funding to create new books.

Get the book

2 Visit openstax.org/subjects and select your book. Then choose your preferred format under "Get the book." We recommend online — our responsive design works seamlessly on any device.

Access instructor-only resources

3 OpenStax books come with free instructor resources, along with additional low-cost resources like online homework and adaptive courseware from our OpenStax Allies. To get access to these resources, make an instructor account at https://accounts.openstax.org/signup. Then, once you've been verified, click on "Instructor Resources" on your book page on openstax.org.

Resources for transitioning to an online or hybrid course

Integrate with your Learning Management System

4 We've been creating LMS course cartridges to make it easier to teach in-person, online, or hybrid classes. We're developing course cartridges for Canvas, Blackboard, Moodle, D2L – click on "Instructor Resources" to see what's available for your book!

Make sure your text is available in your campus bookstore

5 Ask your bookstore to order print copies of your OpenStax book through XanEdu, so your students have the option of purchasing a low-cost print version of their book if they prefer. We want to give students access to print options that suit their budget and course needs, so XanEdu offers both full-color hardcover versions and black and white paperback versions. Students can also buy directly from Amazon.

Get your students started

6 Download the Student Getting Started Guide from the "Student resources" section on your book page and send to your roster. For your syllabus, you can include our Sample Syllabus Language (located under "Instructor resources"), and provide links to assigned sections from the web view of your book.

Spread the word

7 Like us on Facebook or follow us on Twitter and help spread the word about OpenStax. We don't have salespeople, so your recommendation is critical to our mission of getting our free, peer-reviewed, openly licensed textbooks into the hands of as many students as possible.
